READING IMPROVEMENT COURSE

Description

This new course is designed for Agency employees who have a need to read faster with equally good or improved comprehension. The course improves ability to concentrate on printed material and develops skill in vocabulary acquisition. The course is not to be taken as remedial reading training.

Participants will learn effective techniques of reading through drills and timed reading exercises. They will be tested twice during the course to measure their reading speed, comprehension, and vocabulary. Students will learn what is meant by the terms fixation, regression, sweep, sub-vocalization, and perceptual span. They will be trained to identify numbers and words flashed at 1/100 of a second and to read both for factual data and general concepts.

The course will be conducted on either a Monday-Wednesday or Tuesday-Thursday schedule. If there are any questions,

STAT
